

Football – Goal with soccer target SETUP - MANUAL

INSTRUCTIONS FOR USE

Congratulations on your purchase of this product. Before using this football-goal please read the following instructions very careful and keep them in a safe place for further use.

Proposal: Before you assemble the goal, spray some lubricant/ lubricating oil on the smaller end of the connecting pieces. In this case it is much more easier to put the parts together and the life-time of the product becomes longer.

1. **Assembling the frame**

Put together all frame-pipes as you can see on the following picture. Please take care for using the correct parts to avoid damaging the goal-frame or something else.

2 a **Assembling the net**

Attach the net to the frame of the goal and put the cords for attaching through the meshes for fixing the net on the frame in the correct way. With the help of the Velcro-fastenings you can fix the net on the diagonal parts of the goal-frame also. If you have finished, please control very careful the correct and sufficient fixing.

2b. Attaching the Soccer Target (Trainings-equipment in Option)

With the help of the Velcro-fastenings the "soccer-target" will be fixed on the frontpart of the goal-frame. It must be fixed also in the ground with the ground anchors and the elastic rubber bands. Ensure that the clips are on the backside of the goal.

3. Protection of stability of the football-goal

Last you have to fix the goal-frame with the help of the ground anchors, as it s shown in the picture. On hard floors (concrete-floor or asphalt or similar) the goals has to be fixed in other way to prevent risks of injury.

Information for the use

If it is not necessary you should not exposure the goal to a bad weather and store it dry and cool. If you push together the metal-parts it may be possible, that they get rusty. Remove rusty points as soon as possible.

During the play please take care, that all parts are properly fixed .

We wish you a lot of pleasure with your play !
